Services

We are committed to meeting your needs, by supplying the most customized support services in the industry, including:

CatBase Training

Customized for your application, on-site or in our offices.

CatBase Editing

Complete line of editing services to help you transfer your existing data.

CatBase Consulting

Interfacing CatBase to your existing part and procurement systems.

CatBase Support

Get direct access to our software development staff

CatBase Updates

Access the latest CatBase enhancements and additions.

Products

CatBase Lite

CatBase Lite is an entry level system with all of the features required to create, combine and query part books with up to 500 individual components.

CatBase

With an unlimited number of components CatBase is designed for the medium to large customer. Advanced tools simplify the management, verification and distribution of your technical documentation.

CatBase Viewers

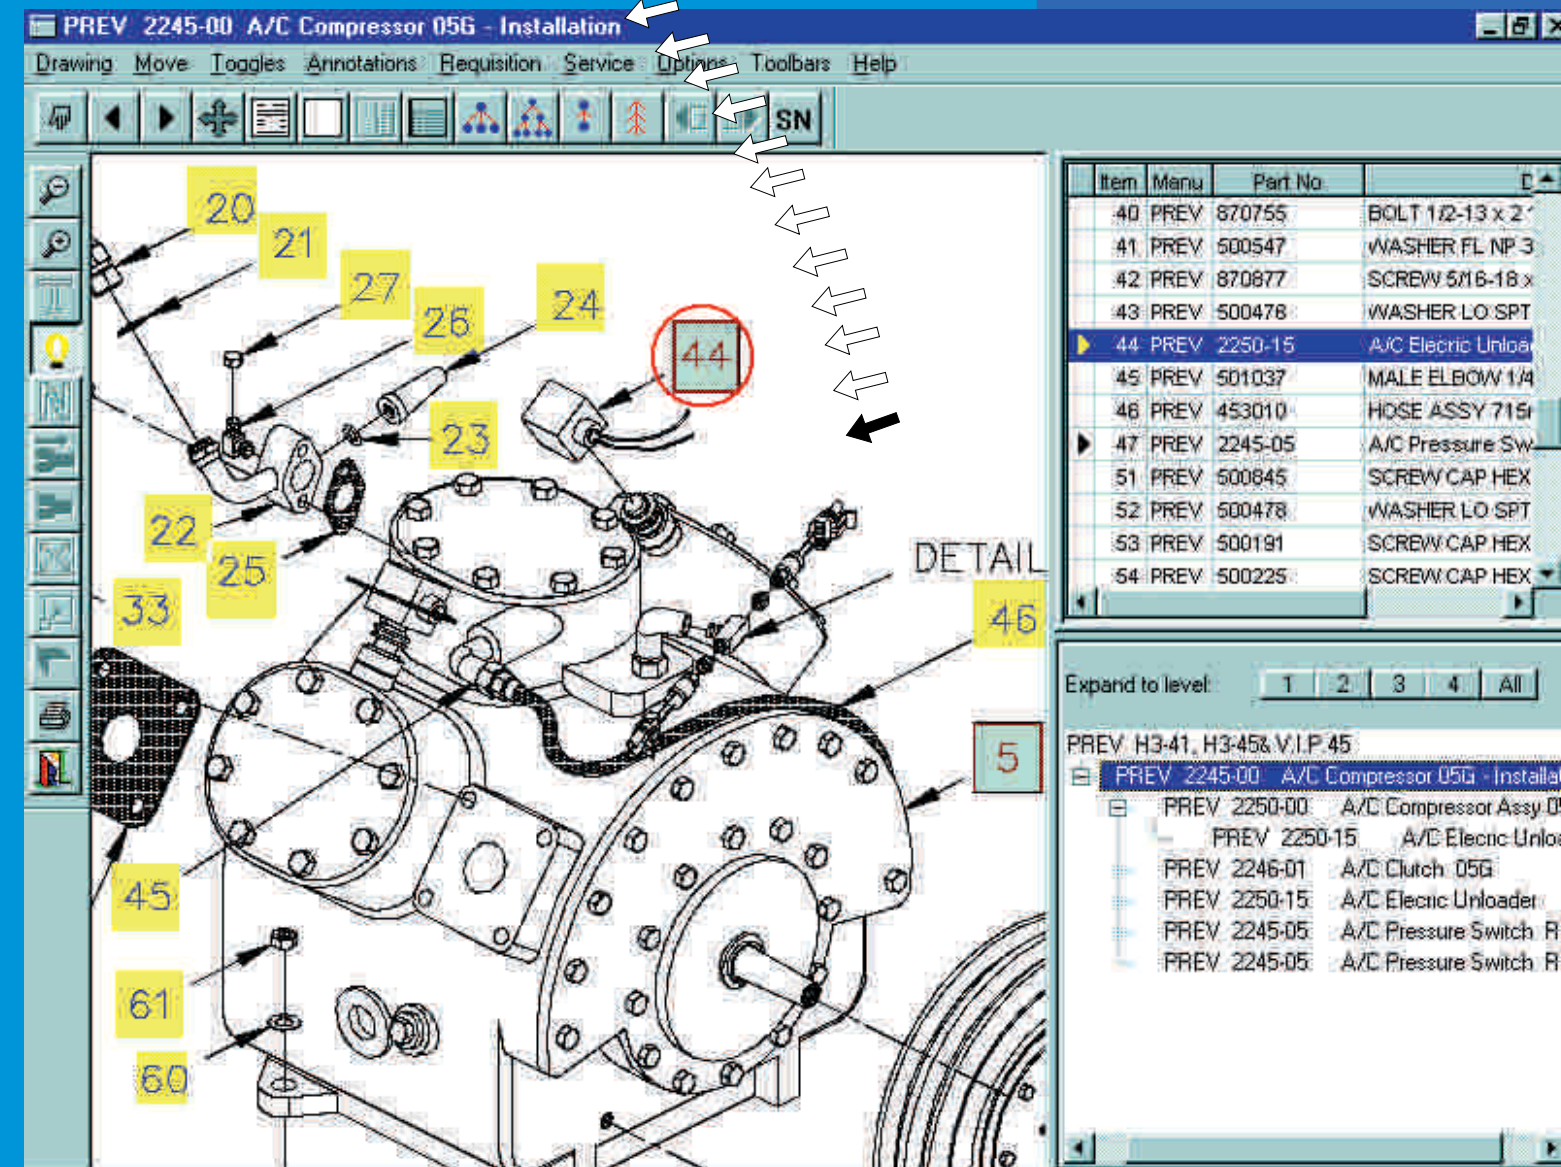

Distribute your completed part books with our easy to use Viewers. Query and view any document created with CatBase.

CatBase Print Module

Deliver your parts book on paper by simply printing your database on a standard format.

System Requirements

CatBase runs on any computer operating Microsoft® Win95 or Win NT™, with as little as 4 Megabytes of memory and 6 Megabytes of free disk space. For Windows 3.11, Catbase 3.1 is also available.

™CatBase is a registered Trade Mark for Novalog Informatique Inc.

CatBase

CatBase is a Windows based electronic part book/technical documentation publishing, distribution and query system, that combines a simple graphical user interface with the advantages of a relational database and document imaging system.

Print

Drastically decrease your document publishing costs with the CatBase part book printing feature. A simple click of the mouse and your part book is automatically formatted, collated and printed.

Distribute

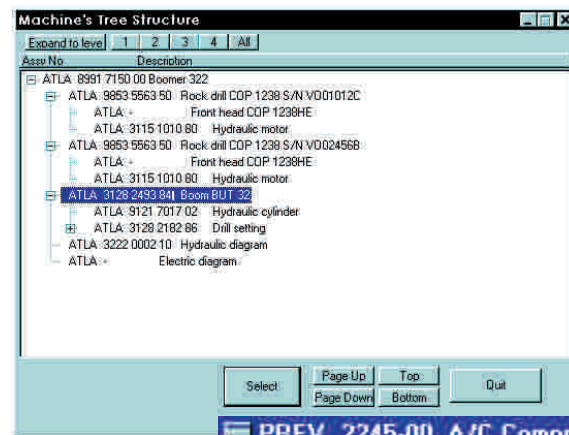

Distribute your documentation electronically with the CatBase Viewer on CD ROM, Local Area Networks or via the Internet.

Integrate

Increase shop productivity by integrating CatBase with your existing part management software.

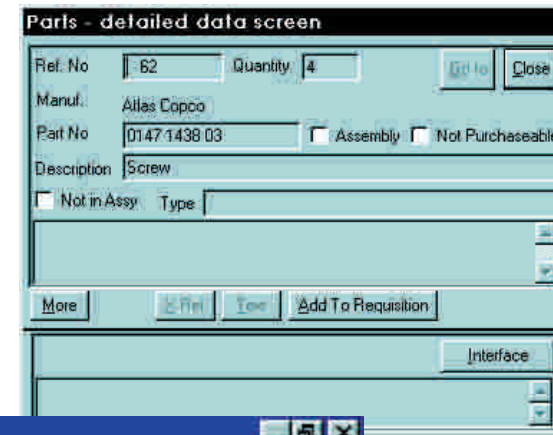

Query

Find the parts that you need directly from the graphical user interface.

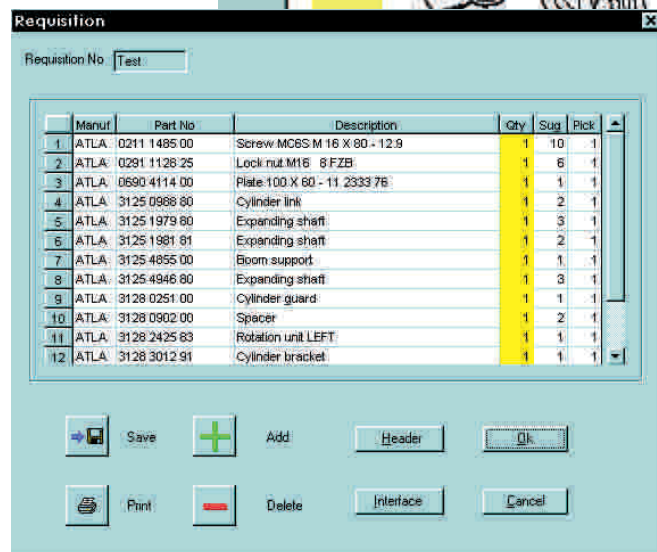

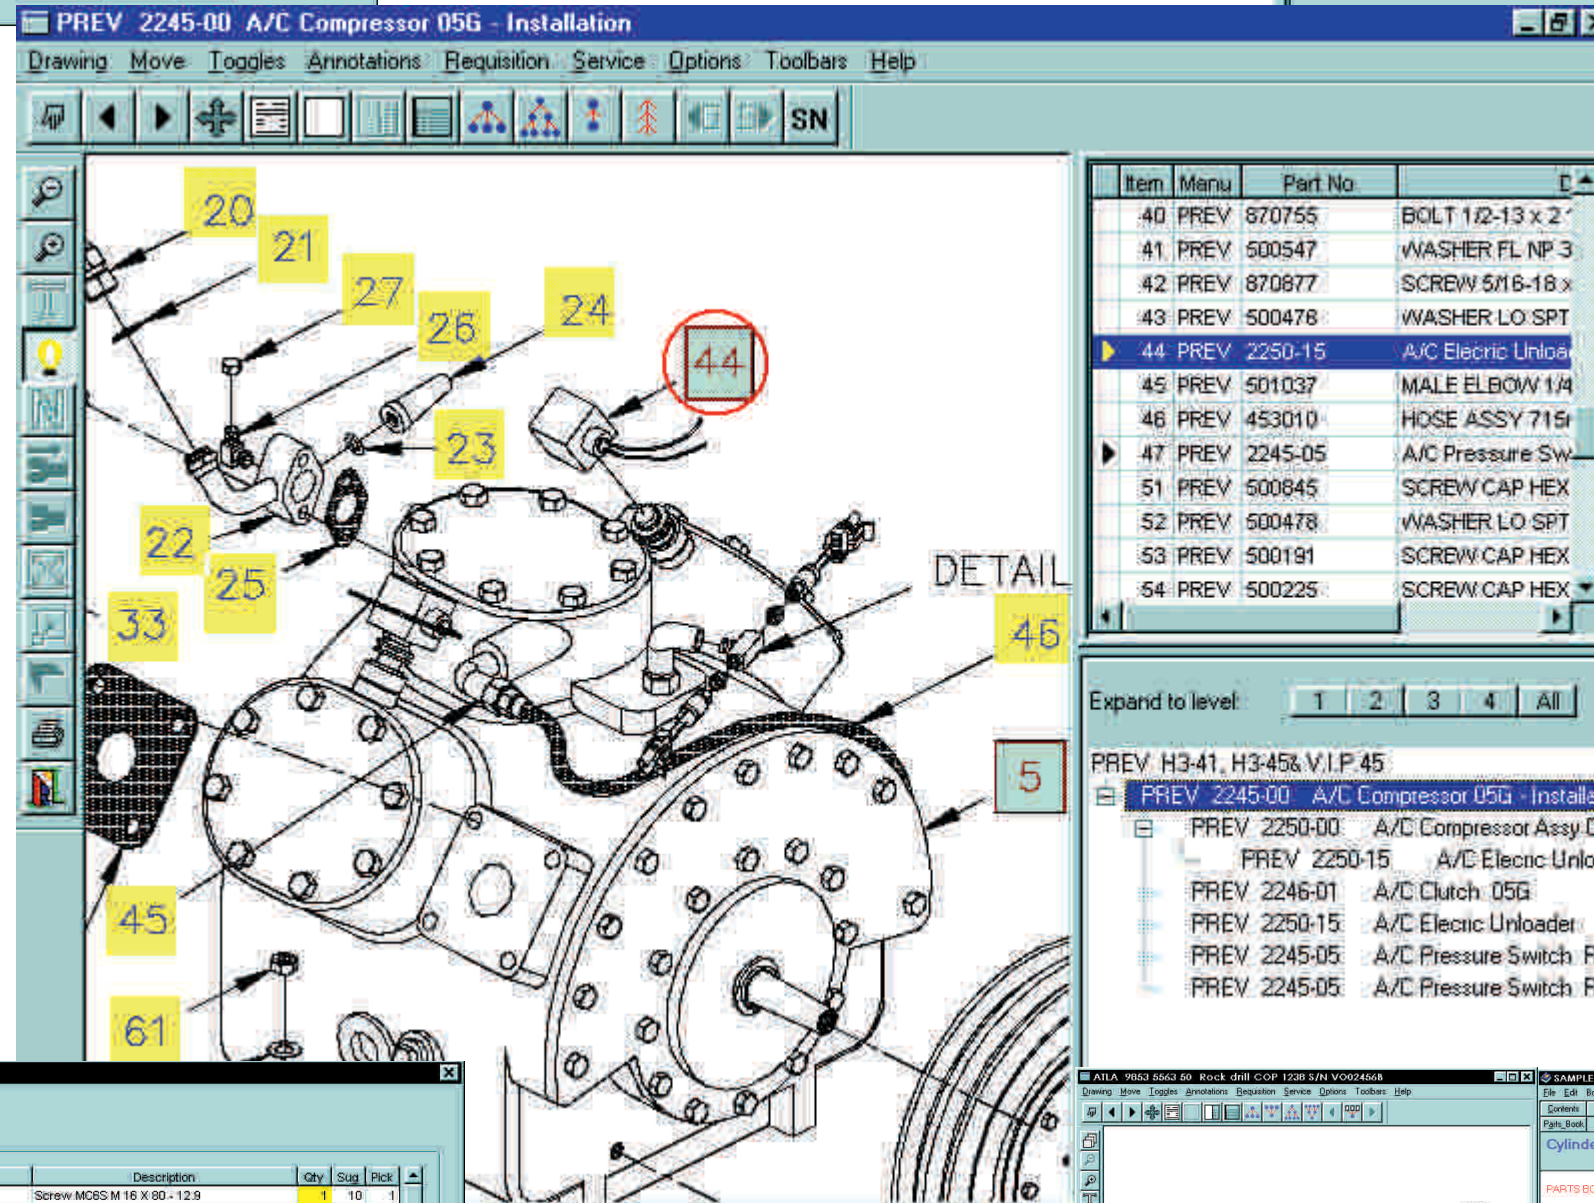

See the part database structure

Access stock information from the detailed data screen

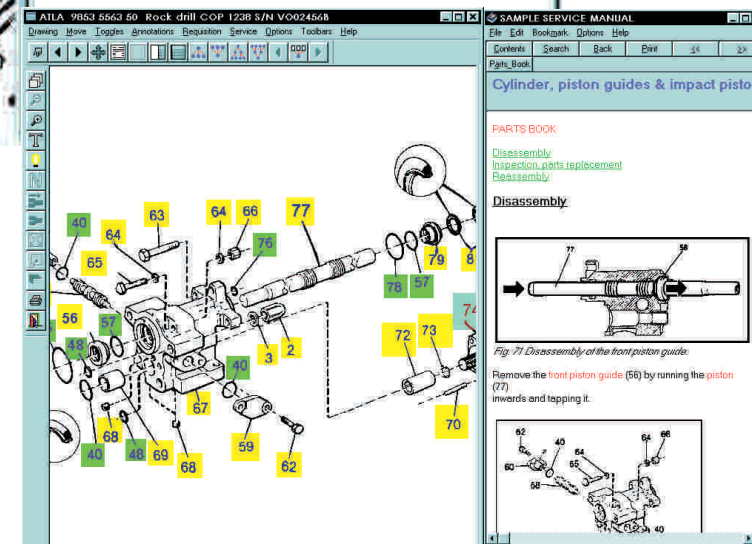

See the synchronized split screen for a faster access to your data

Pick and order parts directly from Catbase

Provide bi-directional links to service manuals

Benefits

Decreases equipment maintenance costs by reducing the time taken to find, select and order replacement parts.

Distributes up-to-date part books, service manuals and safety procedures on the shop floor where the information is most needed.

Seamlessly integrate your own existing corporate documentation with vendor part books and technical documentation.

Decreases documentation costs with features such as serial number management, component reuse and multiple language support.

Provides both electronic distribution (CD-ROM, LAN, WAN or Internet) and printed versions of equipment part books from the same source files.

Improves distributor and customer support by simplifying document update and distribution procedures.
